

WHAT'S NEW IN GEOVIA MINESCHED™ 2025 REFRESH 1

The GEOVIA MineSched 2025 Refresh 1 release has focussed on improving the experience of setting minimum and maximum stockpile capacity rules, as well as resolving key issues reported by our Customers.

NEW FEATURES IN GEOVIA MINESCHED 2025 REFRESH 1

Improved experience when managing Material Movement Rules

When the ability to establish repeatable minimum and maximum stockpile capacity rules was first introduced, some subtle changes were made to the way the Ratio/Priority rules worked. While this was effective in enabling repeatable minimum and maximum stockpile capacity rules, it led to some limitations in how the solution could be used.

The Material Movement tab has been modified to include an Overflow Stockpile column that will show a warning flag if a Maximum Capacity Rule has been applied, and an Overflow stockpile should be selected.

This has simplified the process of setting up Material Movement Rules, reduced the potential for errors to be made when Maximum Capacity Rules are set and allowed the Ratio/Priority rules to be reverted back to the original intended use.

Set concurrent Priority and Ratio rules

When the Ratio/Priority rules were changed to accommodate the new minimum and maximum stockpile capacity workflow, it was discovered that it was not possible to use Ratio rules between Stockpiles of the same Material Type when a Stockpile maximum capacity rules were also set. To accomplish this workflow, concurrent Ratio and Priority rules would need to be set.

It is now possible to maintain a Material Type ratio split between multiple stockpiles, and maintain the Ratio rules to the overflow stockpile if a stockpile maximum capacity rule is reached. This ensures that minimum and maximum capacity stockpile rules can be set in any desired material movement configuration.

Software stability improvements

Several issues that were raised by Customers have been addressed in the Refresh Release. A full list of stability improvements can be found in the GEOVIA MineSched 2025 Refresh 1 Release Notes document.

Our 3DEXPERIENCE® platform powers our brand applications, serving 11 industries, and provides a rich portfolio of industry solution experiences.

Dassault Systèmes, the 3DEXPERIENCE® Company, is a catalyst for human progress. We provide business and people with collaborative virtual environments to imagine sustainable innovations. By creating 'virtual experience twins' of the real world with our 3DEXPERIENCE platform and applications, our customers push the boundaries of innovation, learning and production. "Dassault Systèmes" 20,000 employees are bringing value to more than 270,000 customers of all sizes, in all industries, in more than 140 countries. For more information, visit www.3ds.com
